

Harrison Wipes®, UK leaders in wiping cloth solutions have been working closely with 8 Solutions to provide them with a complete wiping cloth solution for their cleaning and wiping requirements.

Harrison Wipes® provide a comprehensive range of wiping cloth solutions to enable effective cleaning and maintenance of critical IT infrastructure. From low lint and anti-static wipes to absorbent and colour-coded, Harrison Wipes® offer a variety of weights, textures and thicknesses to ensure the right wipe for application.

With over 23 years of experience, 8 Solutions are specialists in data centre cleaning. With over 100,000 successful completed data centre projects, 8 Solutions recognise the importance of regular data centre cleaning as part of an effective risk mitigation strategy for any IT facility.

Harrison Wipes® and 8 Solutions have been working together to establish the cleaning demands of the data centre.

8 Solutions were using Rayon to clean delicate components and computer parts as they required a low-linting wipe because of the risk of residue fibres left behind on surfaces after cleaning.

One of the main challenges faced by using Rayon was that the Rayon material is supplied on large rolls which needed to be manually cut to size by the operator. This process was time consuming and inefficient, costing the business valuable time.

Harrison Wipes® realised that 8 solutions could dramatically improve their cleaning efficiencies by switching to woven microfibre cloths. Harrison Wipes® delivered a proposal which provided high quality, low-lint wipes that are also strong and durable, machine washable, absorbent yet soft for polishing delicate surfaces.

Harrison Wipes® microfibres are packaged pre-cut, in a uniform size with clean-cut edges for reduced linting. These features enable reduced usage and wastage, and improved cleaning times.

An additional requirement 8 Solutions and Harrison Wipes® identified as important to ensure the maintenance of the clean environment was colour-coding. As the microfibre cloths are available in 4 colours, they provide effective control against cross-contamination for critical cleaning areas.

With the introduction of Harrison Wipes® microfibre cloths, 8 Solutions have seen a reduced usage in cloths as well as improved cleaning times.
