

## Wipes for Cleaning Leather Furniture

**Harrison Wipes®**, UK leaders in bespoke wiping cloth solutions have been working closely with McKlords to provide them with a superior, soft, low lint wipe for cleaning and polishing leather furniture

Harrison Wipes® provide high quality non-wovens designed to effectively clean delicate surfaces.

McKlords pride themselves on providing bespoke solutions to customer problems within the retail industry. Understanding that quality is key, Harrison Wipes® and McKlords work to ISO 9001 standards.

McKlords supply two high street furniture stores, each providing high quality leather furniture.

McKlords' customers were unhappy with the wipes they were using to clean the leather sofas and beds and so McKlords asked Harrison Wipes® to help in provide a

soft, low lint product.

The customers were using cloths made from a blend of polyester and viscose which was leaving lint behind on the surface.

Another challenge faced by the customers was that the wipes were too small to effectively clean a large surface area. This meant the employees were using a high number of wipes which increased the cost in use. The whole process was time consuming and inefficient, costing the business valuable time.

Harrison Wipes® realised that McKlords could improve their customers' cleaning

efficiencies by switching to Harrison Wipes® Polishing Cloth.

Harrison Wipes® delivered a proposal which provided, soft, low lint wipes ideal for polishing delicate surfaces.

The larger size of the Polishing Cloth enabled the customers to effectively clean the high quality leather. This reduced usage, wastage, improved cleaning times and the end result was well presented leather furniture.
